POSITIVE SUBLIMINAL MESSAGES CAN BRING POSITIVE BEHAVIOR IMPROVEMENT

Expando-Vision™ is a computer/video system that helps you to displace negative images by flashing positive subliminal messages directly to your subconscious while you watch regular TV programs. The periodic messages occur too fast (1/30 of a second) for your eye to see, but your subconscious does see them — providing you with a storehouse of positive influences which your conscious mind can use to establish positive daily behavior.

Behavior patterns that may harm or frustrate you — such as overeating, smoking, drinking, shyness, nervousness — are rooted in your subconscious mind. You are not usually aware of what causes these negative patterns and their undesirable effects; the causes lie below the level of conscious thought.

Expando-Vision helps you take charge of your life.

EIGHT PROGRAMS TO BUILD POSITIVE NEW HABITS. ONE OR MORE OF THEM COULD CHANGE YOUR LIFE!

Weight control/exercise
Help yourself to control eating habits...promote wholesome attitudes toward exercise... develop a "thin" self image.

Control smoking/calm nerves
Fill your subconscious with positive images needed to kick the tobacco habit. Promote calm nerves. Cultivate a "can do" attitude.

Athletic confidence/golf
"Inner golf" can give you a competitive edge by developing positive images you need to improve your game. Look for more athletic programs soon.

Study habits/memory power
Program yourself with the positive images you need to improve exam scores...develop disciplined study habits...and strengthen your power of memory.

SCIENTIFICALLY BASED PRINCIPLES

All Expando-Vision messages are clinically prepared by a team of qualified psychologists, using the most advanced behavioral research data available.

The subliminal technique has been the subject of study and experiment by leading psychologists for more than 20 years, and has been shown effective. Now computer microchip technology makes it possible to bring the technique out of the laboratory and into the home.
